SUMMARY

Frontend Developer with over 4 years of expertise in Angular 11+ and InsureTech architecture, specializing in JSON-driven and multi-tenant enterprise solutions. CTO Hall of Fame recipient recognized for delivering 7+ major projects, including a white-labeling theme engine that eliminated code-level styling deployments. Proven track record in optimizing Workflow Handling and data persistence, reducing configuration defects and session loss in high-scale production environments.

EXPERIENCE

Feb 2022 – Present **METAMORPHOSYS | MUMBAI – SOFTWARE DEVELOPER**

Product Configuring Application

- Constructed scalable Insurance Product Configurator modules using Angular and NG-ZORRO, while optimizing Workflow Handling and backend data transformations to streamline policy and premium setups.
- Developed an extensible Product Wizard and JSON-driven Master Data UIs, resulting in reduced manual maintenance and fewer configuration defects through improved workflow stability.

Claims Application

- Architected a JSON-driven theme engine to support white-labeling across Claims and Provider Management apps, enabling instantaneous client branding updates without additional code deployments.
- Engineered high-flexibility UI screens for a multi-tenant architecture, utilizing Angular to deliver dynamic workflows and role-based access controls based on real-time claim stages.
- Orchestrated the end-to-end delivery of release enhancements and production hotfixes, ensuring 99%+ application stability while maintaining comprehensive technical documentation for team-wide scalability.

Pet Portal Application

- Constructed the Prequote, Proposal, and KYC components using the Taiga UI framework, integrating REST APIs to manage end-to-end user data flows.
- Created local data caching and draft-saving mechanisms, which prevented data loss and ensured session persistence during API failure scenarios.
- Built automated premium calculation and eligibility workflows, resulting in accurate real-time quotes based on complex product rules and user-provided data.
- Delivered secure payment gateway return-handling logic, ensuring seamless workflow continuity and data retention for policy approval processes.

Customer Portal Application

- Developed Customer Portal functionalities to support seamless customer interactions, policy access, claims visibility, and real-time information updates.
- Integrated backend APIs and services for authentication, policy details, customer communication, and real-time data management.

Jan 2020 – Oct 2020 **TATA DIGITAL | MUMBAI** – INTERN SOFTWARE DEVELOPER

- Developed a company-wide women's safety application featuring one-touch siren and torch activation, real-time location tracking, and automated battery status alerts through SMS and email notifications in case of emergency.
- Contributed to the development and enhancement of the Tata Neu application by designing and implementing a user-friendly walkthrough experience to improve usability and user engagement.
- Worked extensively with Swift, Cocoa Touch, and MySQL for application development, backend integration, and data management.

Soft Skills & Collaborations.

- **Agile Methodologies:** Executed Agile and Scrum practices using Jira and Excel to sprint planning, issue tracking and documentation.
- **Team Collaboration:** Partnered with cross-functional teams including BA, QA, DevOps, and backend to deliver integrated, high-performance systems.
- **Team Handling & Mentoring:** Directed software modules independently, mentored junior developers in coding standards, debugging, and architectural understanding.
- **Ownership & Leadership:** Proactively owned key modules like Product Configurator, Claim Report, and Business Rules Center systems from development to deployment.
- **Client & Stakeholder Communication:** Facilitated requirement gathering, analysed change request, and conducted stakeholder feedback sessions to align deliverables with business objectives.

TECHNICAL SKILLS

- **Language:** JavaScript, TypeScript and SQL.
- **Frameworks & Libraries:** Angular 11+, RxJS, NG-ZORRO, Taiga UI.
- **Web Technologies:** HTML5, CSS3, Bootstrap.
- **Data Formats & APIs:** JSON, REST APIs.
- **Tools & Platforms:** Bitbucket, Git, JIRA, WinSCP, PuTTY.
- **Database:** MySQL
- **Core Competencies:** Data Structures, Software Requirement Analysis, Multi-tenant Architecture, Workflow Handling.

EDUCATION

2020 **VEERMATA JIJABAI TECHNOLOGICAL INSTITUTE (VJTI) | MUMBAI**

Master in Computer Application

2016 **ATHARVA COLLEGE OF ENGINEERING | MUMBAI**

Bachelor's in Computer Application

ACCOMPLISHMENTS

- Rewarded by CTO as CTO – HALL OF FAME.
- Got appreciated multiple times by the leadership team for my contributions and was rewarded as Employee of the month.
- Represented India in Futsal U-20 World Cup in 2014.
- Ranked 25th among 20,000 + students in MAH MCA CET 2016.
